

Bed Bug Treatment

INSTRUCTIONS FOR CUSTOMERS

BEFORE PROFESSIONAL TREATMENT

TEXTILES

- Place bed linens, bedding from wardrobes and storage spaces under the bed, clothes from wardrobes (if the wardrobe is near the infested bed/sofa), and curtains from the infested room into a **plastic bag**.
- Leave the plastic bags **in the room** until the ADERA technician arrives.
- Items sensitive to high temperatures and washing must be frozen, placed in a tumble dryer, or sprayed during treatment.

METICULOUS CLEANUP

- Dust, sweep, and mop the affected area. **Cleaning will increase the product's effectiveness.**
- Vacuum everything and **destroy** the vacuum bag.
- Wash the vacuum hose carefully in water **warmer than 60 °C, letting the water run through it for at least 5 minutes.**

FURNITURE

- **Don't handle or move the furniture** into other rooms.

ELECTRICAL APPLIANCES

- **Unplug** all appliances from electrical outlets.

ITEMS AND FOOD

- **Do not remove** any objects from the room and consult an ADERA technician about the possibilities of their treatment (e.g. in a freezer at -5 ° C for two days or until completely frozen through, or by ironing).
- Remove items such as pictures and mirrors from the walls and **leave them in the room.**
- **Put away or cover** food, herbs, toys and valuable items.
- If you have an **aquarium** in your flat, **switch off the aerator and cover it.**

*Before treatment itself, you will need to **leave the flat along with any pets!***

FOLLOWING PROFESSIONAL TREATMENT

RETURNING TO THE FLAT

- You can return to your flat **after the protective period** (at least 8 hours for people and 12 hours for pets).
- You can return to the flat once the **insecticide has completely dried**.

CLEANUP

- **Do not wash** the treated surfaces (only wash surfaces that may come into contact with food). **Do not vacuum** carpets and upholstered furniture. Only vacuum floors without carpets. Follow these instructions until the next ADERA treatment.
- Following the first treatment, **wash the bed linen, clothing, and other textiles on the highest possible temperature** (at least 60 °C).

OCCURRENCE OF BED BUGS FOLLOWING TREATMENT

- **It is quite common** to encounter live bed bugs for the first few days to weeks after the treatment.
- **The insecticides may not immediately reach all the bed bugs** – they will come into contact with the insecticides in the following days.
- **No insecticide kills eggs** – it only kills the hatched bed bugs.

SLEEPING IN BED

- After the protective period, you can **sleep in the bed** again.
- **It's very important** that you keep using the rooms where the bed bugs are as you normally would.
- Put **clean bed linens** on the bed (do not sleep in the bed without bed linens).

RECOMMENDATION AFTER TREATMENT

- **Do not move** furniture in the flat and do not bring in new furniture.
- Store items thermally treated after the first treatment **at a sufficient distance** from the infested bed/furniture.
- Wash bed linens **1× per week** (at at least 60 °C).

One treatment will never kill all the bed bugs, the insecticide must be re-applied in 3-4 weeks.

PRODUCT SAFETY

- ☐ Follow instructions and observe the protective period in order to ensure product safety.
- ☐ Product may leave temporary marks on furniture or the floor, but these do not usually cause any long-term damage.
- ☐ Once the pests are eradicated, the marks can be easily wiped away. **Never wipe product off before the bed bugs are eradicated or before the recommendation of the ADERA technician.**

ERADICATION WARRANTY

YES NO

Eradication warranty can be provided:

☐ ☐

Following the _____ **intervention** by an ADERA technician

WARRANTY CONDITIONS

- ☐ Compliance with all the above **instructions before and after the intervention**
- ☐ Compliance with **all instructions of the ADERA technician**

ORDERING ANOTHER TREATMENT

Your ADERA technician will help you book follow-up treatments as necessary.

I have been fully instructed and informed.
I am aware that the treated surfaces may be damaged.
